

Manager: Pieter Tolmay

The North West FabLab situated in Potchefstroom on the premises of the North West University (Mechanical Engineering building), is the fifth FabLab to be commissioned and launched by the DST on the 02nd August 2007. The North West FabLab is the second FabLab which is regarded as “Basic Research” FabLab. Basic Research is done with research institutes on specific advanced technology projects destined for FabLab applications. These FabLabs also accommodate students and provide a platform for project fabrication, assisting in them satisfying the project aspects of their studies/ degrees (diplomas).
